FOREWORD

The name Fred Pridmore needs no introduction as a student of British Colonial coins, and his collection is very much that of the student collector. Many of the rarer or expensive pieces, usually available on the market for those willing or able to pay, are missing: on the other hand the collection contains many rare, and even more obscure, pieces that no amount of money could buy. Travelling the world as a soldier for nearly forty years, he spent much of his spare time searching for anything of interest. There is some irony that the West Indies, an area which became his major interest, was just about the only station to which he was never posted during his military service. Though I must have met him before in London, my first recollection of Fred is 1952, when, up from Singapore, he called in to Gun Club Barracks, Kowloon, to have a drink with me, the office boy doing his National Service.

The First Part of the collection comprises America (Canada and The West Indies), Europe and Africa. Foremost is his unsurpassed collection of "cut and countermarked" of The West Indies, which is offered (lots 151-458) apart from the regular issues (lots 45-150). The collection was enhanced considerably as recently as 1973, when Spink & Son Ltd., acquired the "Hopkins Hoard" as it has become known. Other provenances include Howard D. Gibbs, whose Counterstamped Coins of the Americas were sold by Hans Schulman in 1966, and H. M. Lingford, remembered for is sale of English Crowns at Glendining's in 1950, and Coins of James I in 1951, though the balance of his considerable collection was later sold privately to A. H. Baldwin & Sons Ltd. Several important pieces are "ex T. B. Clarke Thornhill"; what the British Museum did not acquire for the National Collection was sold at Glendining's (the British portion on 24th May 1937), but very few cut and countermarked pieces are listed in the catalogue. That Clarke Thornhill saw the coins is not in doubt for his writing was on the envelopes in which the coins were offered to Pridmore: that they were also marked with a cross as rejects is not quite so easy to accept.

Other than The West Indies, the largest group is Cyprus (lots 575-648), a series in which Pridmore took a great interest, having served there 1966-70. At this time he wrote "Modern Coins and Notes of Cyprus", subsequently published by the Central Bank of Cyprus, listing Turkish, French and British coins which had circulated in the island, many of which are represented in the collection.

In the text of the catalogue, references are generally to Pridmore's "Coins of the British Commonwealth of Nations", and the sequence of countries he gives for The West Indies and Europe is followed: for Africa, the order is alphabetical. An Index is included at the back of the catalogue.

In the 32 plates, all the cut and countermarked pieces have been illustrated, and the weights have been given for the cut, if not the countermarked. Very often, the weight noted in the catalogue will differ from that on the ticket or that given in a published work: to try and "get it right", our electronic balance was serviced immediately prior to weighing the coins. Pridmore's tickets are sold with the coins, and some relevant comments on them are quoted in the catalogue, though they sometimes could be more informative as I have very nearly found to my cost when preparing the catalogue.

In one area, I disagree with Pridmore on more than one occasion, and that is as to what might constitute a "proof". As cataloguer, I have given my view, though have noted where Pridmore thought otherwise, if in any doubt.

Peter Mitchell,
A. H. BALDWIN & SONS LTD.

Foreign Coins Circulating in Cyprus

Before 1878, when Cyprus was assigned by the Ottoman Sultan Abdul Hamid II "to be occupied and administered by England", the currency system was based on the Turkish Piastre. Even after the introduction in 1879 of the local bronze coinage with portrait of Victoria, Turkish coins together with British Imperial silver and British and French gold coins formed the currency medium until the circulation of different issues was curtailed by proclamation in 1882 and 1901. For a full discussion, see Pridmore "Modern Coins and Notes of Cyprus" (MCNC), pp 73 ff. References are to the listing in this book.

SALE CATALOGUES

On the average we issue twelve or more Coin Catalogues and three Naval & Military Medal Catalogues each year, some of which are usually of Sales of important Collections.

CATALOGUE SUBSCRIPTIONS

Sale Catalogues, frequently illustrated, are normally posted to Subscribers about three weeks prior to the date of Sale.

Lists of "Prices Realised" are issued after each Sale, thus giving at a glance a reliable guide to value. The final test of value must always be auction prices rather than the figures given in books of reference, for changing times and fashions soon render the latter obsolete and misleading. The Lists of "Prices Realised" will probably be enclosed in a following Sale Catalogue.

AIR MAIL POSTAGE

To allow subscribers resident outside Europe time to submit Postal Bids, Sale Catalogues will, if desired, be sent by Air Mail. Air Mail postage is not, however, included in the Subscription Rate and the cost must be borne by the Subscriber. In such cases a deposit against the cost is required.

ANNUAL SUBSCRIPTION RATES

(*commencing from* 1*st January*)

for Catalogues and subsequent lists of Prices Realised
